CURVED GLULAM HOCKEY STICKS

Curving timber is a tricky business at the best of times but curving timber to right angles is what Vicbeam has achieved in this unique project.

With a radius of 1.5m, the laminates needed to be 10mm thick and with some serious modifications to our normal curve press, the radius was achieved with millimetre precision. GL13 H3 treated Radiata Pine was coated with a clear finish and delivered on-site to be installed.

The bazoo bar now has a wonderfully unique outdoor covered deck that is a great place to enjoy a drink and catch up with your mates.
